# MOBILE MEDICAL CLINICS

## IN YEMEN'S HAJJAH GOVERNORATE

The KSrelief's Mobile Medical Clinics Project in Yemen's Hajjah governorate provide primary health care services to those most in need in the area. The clinics have achieved remarkable success in providing free health services and medications to people who live far from other Hajjah health facilities; movement around the governorate is difficult and can be limited by the security situation in the region.

تشغيل منظومة  
العيادات الطبية  
بمبنتها

### Branches of the Project :

Al Gharza | Abs | Al Deer | Razih | Waalan

### MAIN ACTIVITIES OF THE PROJECT

Securing medicines and medical supplies

Providing primary health care services  
(including health awareness and education).

Conducting the safe disposal of medical waste

### MOBILE MEDICAL CLINICS INCLUDE

Emergency care (ER)

Internal medicine

Injury treatment

Epidemic disease control

Reproductive health  
services

Nursing services

Health education

Pharmacy services

## ZAHRA'S STORY

The Waalan IDP camp in Yemen's Harad district is one of 67 internal displacement centers in Hajjah. These sites are located in the districts of Midi, Hayran, Harad, and Abs, where more than 700 displaced families live, including the family of Zahra Abkar Miswak.

Zahra, a displaced woman in her mid-fifties, lives in the Waalan IDP camp. She suffers from severe pain and internal ear disorders due to a serious injury that has led to hearing impairment, tinnitus and balance issues. She also has chronic high blood pressure.

Zahra told us her story: "As we were fleeing from our home to the displacement camp, I fell out of the car to the ground and hit the left side of my head. A few days after the accident," she continued, with her hand over her ear, "I heard a ringing in my left ear, accompanied by severe pain and dizziness, nausea and loss of balance."

She went to Waalan camp's mobile medical clinic, where she receives ongoing monitoring of her health condition. "The pain has reduced significantly, especially during the day, as a result of periodic examinations and weekly follow-ups", she said, adding that "the advice and guidance from the physician and receiving the appropriate treatment have contributed significantly to the improvement of my health."

Every month more than 360 patients, most of whom are displaced, are treated at the Waalan Medical Clinic, one of the five mobile health facilities funded by the King Salman Humanitarian Aid and Relief Centre (KSrelief) to provide high-quality primary care services in Yemen.

# TOP 15 BENEFICIARY COUNTRIES BY COST (USD):

	YEMEN		407 Projects		873 million
	PALESTINE		22 Projects		57 million
	SYRIA		50 Projects		47 million
	SOMALIA		17 Projects		23 million
	PAKISTAN		52 Projects		18 million
	LEBANON		15 Projects		17 million
	IRAQ		6 Projects		15 million
	TURKEY		3 Projects		12 million
	BANGLADESH		23 Projects		9 million
	SUDAN		56 Projects		8 million
	TUNISIA		2 Projects		7 million
	MYANMAR		4 Projects		6.8 million
	AFGHANISTAN		7 Projects		6.4 million
	UKRAINE		2 Projects		5 million
	CHINA		1 Project		4.9 million
